An inter-college hackathon was held at Vidyavardhaka College of Engineering, Mysore. Our team was one of the few consolation prize winners for a project based on event management using blockchain.

## Projects

### • Health Care Web-app

A very useful web app that's transforming healthcare. It helps people easily find top doctors, quickly book appointments, have online consultations, and make more intelligent health choices.

### • Text Summarizer using Machine Learning

A web app that automatically generates concise summaries from lengthy text documents, enabling users to obtain key insights quickly and efficiently.

### • Mobile Application

A mobile application for a divine/religious foundation called WAHTS Foundation, Bangalore. The app includes multiple features like lectures, audio, donations, and many more.

## Certifications

**Responsive web design course under freecodecamp**
